

Bugari Evo HARIA P41/B55

Digital Accordion

Music is all about passion! The famous Bugari accordion brand expands its range with the HARIA P41 (piano-type) and HARIA B55 (button-type) Digital Accordions. These two models mark the official start of the BUGARI EVO division, which is dedicated to digital accordions.

Great care was taken to preserve the feel of an acoustic accordion and all those little details that have turned Bugari instruments into coveted classics that appeal to the mind, the hands and the heart. The HARIA-series is quintessentially about **technological innovation (powered by ROLAND)**, coupled with the **passion of time-honored craftsmanship**.

The HARIA P41 and B55 are both special and unique, waiting for you to make them your own and to convey your emotions through your music like never before on an electronic instrument.

These next-generation accordions are perfect to express yourself in front of a large audience with the same articulation and refinement as on an acoustic instrument.

For the first time ever, the grand accordion tradition is truly enhanced by technology: Haria looks, feels, plays and responds like a fine acoustic accordion but adds massive sonic options.

In line with common market requests, the HARIA has FIVE NEW KEY FEATURES:

- High-quality keyboards crafted by Bugari: the HARIA-series will feel instantly familiar for traditional players. The keyboards with a genuine accordion touch provide a perfectly natural feel and response.
- The Natural Air Flow System accurately simulates the bellows response of an acoustic accordion. It works the same for keys and buttons: when a key is pressed, a lever system lifts a pallet, allowing the air to flow to the hole. The result: perfectly natural movements of the bellows.
- New look with redesigned wooden cabinet. The accurate shape of the cabinet ensures perfect playability of the instrument and a comfortable feel.
- The digital sounds and the underlying technology are supplied by Roland. BUGARI and Roland have teamed up to satisfy even the most exacting requirements of accordion players. Haria is the perfect combination of Bugari's enviable acoustic accordion experience with Roland's unsurpassed sound generation technology.
- The on-board speakers (two woofers plus two tweeters) are driven by a high-quality amplification system. The wooden cabinet provides an excellent acoustic response and produces a warm, clear sound.

The HARIA P41 and B55 will be available in July 2016.

They will be premiered at this year's Musikmesse in Frankfurt, from 7 to 10 April 2016. (Booth 9.0 E81)
