# Welcome to the Algarve

Europe's most famous secret

Algarve

# Algarve

United and diverse; this is the Algarve. A tourist destination comprising 16 municipalities, each with its own identity, charming scenery and special stories to share.

The Algarve's geographical location confers special bioclimatic conditions on the region. The climate is temperate with Mediterranean characteristics. The sun shines for over 3,000 hours a year and the average annual rainfall is low.

The most important activity sector is the tertiary sector (commerce and services) due to the main economic activity - tourism.

## Accordion in Algarve

The accordion, a fundamental instrument for the Algarve's traditional dances, first appeared in the region towards the end of the 19th century, and soon became popular, bringing added interest to local repertoires. Players reinvented and combined melodies and rhythms of polkas and mazurkas to those of the old bailes de roda, giving rise to the rhythmic and harmonic richness of the Algarve's folk music groups, whose dances incorporate influences from the various peoples whom they encountered over the years.

## Castro Marim

The elegant outline of flamingos.

The dusty gold of soft sand, the turquoise blue of warm waters. Vast ranges of hills covered in a bright carpet of wild flowers. The tranquil countryside along the banks of the Guadiana, lush with orchards and vegetable gardens. These are just a few facets of a municipality that stretches from the sea to tile hinterland, with a river as its boundary.
