

INTERNET www.bundesgesundheitsministerium.de
www.zusammengegencorona.de**Regulations for persons entering
Germany in connection with
coronavirus SARS-CoV-2/COVID-19**

Dear travellers,

Welcome to Germany! Please note the following:

- If you are entering the Federal Republic of Germany and have spent time in a **risk area** within the 10 days prior to entry, according to Land law you are generally required to proceed **directly** to your **own home, or other suitable accommodation**, immediately upon arrival and remain exclusively at this location for a period of 10 days (or 14 days following a stay in an area of variants of concern) after your entry into the country (quarantine). Violations can be punished as an **administrative offence** with a fine of up to 25,000 euros.
- A **risk area** is any country or region outside of the Federal Republic of Germany for which, at the time of entry into the Federal Republic of Germany, an increased risk of infection with the SARS-CoV-2 coronavirus exists. List of risk areas: <https://www.rki.de/risikogebiete>
- **Before entering the country**, you are required to **register** at www.einreiseanmeldung.de and **carry the confirmation with you when travelling**. This confirmation will be checked by your carrier and potentially also by the Federal Police in the context of the entry control. Moreover, the Federal Police also carries out such border controls when performing its border police duties (e.g. if you enter Germany by road).
- Should you, for want of the necessary technical equipment or because of a technical malfunction, be unable to conduct a digital registration on entry, you will be required to fill out a substitute registration. Please refer to the substitute registration for information on where to submit it (e.g. to the carrier or to Deutsche Post E-POST Solutions GmbH, D-69990 Mannheim).
- Furthermore, you must possess **proof of testing** within a **maximum of 48 hours after entering the country** and present it to your local authority within 10 days of your entry if requested to do so. Valid proof is a medical certificate or a negative test result for infection with the SARS-CoV-2 coronavirus. Air travellers should observe the general obligation to furnish proof of testing before departure, irrespective of whether or not they have spent time in a risk area.
- If you are travelling from an **area with a particularly high risk** of SARS-CoV-2 infection, you must get tested **before starting your journey**, since you must be able to present proof to the local authority or Federal Police when entering the country should they request it. When using a carrier, you need to already present this proof to your carrier before starting your trip. Areas at particularly high risk are areas in which there is an especially high risk of introduction on account of the spread of mutations of the virus or a particularly high incidence rate. These are also published on the above-mentioned website by the Robert Koch Institute.
- With regard to the obligation to quarantine, please refer to the law of the federal Land that applies to you and consider that, as a rule, the 10-day quarantine can only be lifted with a negative test result at the earliest after the fifth day following entry. The 14-day quarantine following a stay in an area of variants of concern cannot be lifted prematurely through testing.
- Even if you do test negative, you are required to **contact your competent health office** (<https://tools.rki.de/PLZTool/en-GB>) without delay should **symptoms typical** of an infection with the SARS-CoV-2 coronavirus (difficulties breathing, newly developed cough, fever or loss of smell or taste) emerge within 10 days of entry into the country.

The Federal Ministry of Health

Risk areas

Hygiene tips

	Digital Entry Registration	Compulsory Test (Evidence)	Quarantine Obligation (Isolation)	Ban of Transportation
Area of Variant of Concern	Control at check-in and upon entry ✓	Upon entry or begin of transportation: negative PCR-Test (max. 72 hours) OR Antigen-Test (max. 24 hours) Proof of vaccination or recovery not sufficient ✓	14 Days ✓	✓
High Incidence Area	Control at check-in and upon entry ✓	Upon entry or begin of transportation: Proof of vaccination or recovery OR negative PCR-Test (max. 72 hours) OR Antigen-Test (max. 24 hours) ✓	10 Days Shortening from the 1st day with proof of vaccination or recovery OR from 5th day with proof of negative test for children under 12 years end automatically after 5th day ✓	✗
Other Areas	✗	Upon entry or begin of transportation (airway): Proof of vaccination or recovery OR negative PCR-Test (max. 72 hours) OR Antigen-Test (max. 24 hours) ✓	✗	✗
